DETAILED ACTION

1. The finality of the Final Office action mailed October 18, 2006 was withdrawn. The withdrawal of finality was based upon the Petition Decision in reply to Applicant's Petition filed under 37 CFR § 1.181 on 10/30/2006, and the Petition Decision in reply to Applicant's Request for Reconsideration of Petition filed under 37 CFR § 1.181 on 1/16/2007. In both cases, the petitions were **GRANTED-IN-PART**.

2. The present application is now before the examiner for consideration of the amendments filed September 20, 2006, and January 17, 2007, which will be considered as replies to the Final Office action mailed October 20, 2005, and immediate preparation of a new Office action.

3. Claims 9-14, and 58-73 are presently pending. Applicants canceled claim 8, and claims 9-14 were amended to depend from claim 58. The rejection of claims 8-14 under 35 USC 103(a) set forth in the Office Action mailed 10/20/2005 is withdrawn in response to Applicants cancellation of claim 8, and amendment to claims 9-14.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 9-14, and 58-73 remain rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, for the reasons of record, and for those reasons set forth below:

Instant claim 58 (and those claims dependent therefrom) remains vague and indefinite to the extent that the instant claim still recites wherein the "antisense strand that, when expressed as RNA, binds to an mRNA transcribed from the target nucleic acid sequence," (see lines 15-16), this statement suggests that the antisense RNA produced from the sense stranded of the cloned double stranded DNA, targets an mRNA other than the mRNA product "coded for by a sample nucleic acid in the target nucleic acid" as set forth in the preamble of the claimed method.

Additionally, the nature of the "oligonucleotide family" recited in claim 58, line 7, is vague and indefinite. It is unclear if all of the oligonucleotide family members are designed to target one particular gene target or sample nucleic acid in said target, or if they have random sequences that target multiple genes.

Moreover, the instant claim is incomplete since there is no mention of a control, un-transfected host cell, such that changes in phenotype can be assigned to one particular antisense RNA targeting one particular gene target, by comparison of the transfected host cell, and the un-transfected host cell.

Claim 59 (and those claims dependent therefrom, claims 60-63, and 70), lines 2-3 recite "a catalytic domain that cleaves ***an*** mRNA sequence transcribed from the target nucleic acid," this phrase is suggestive of multiple mRNA sequences transcribed from the target nucleic acid. However, as stated in claim 58 (from which this claim depends from), the intended objective of the claimed method is to assign a function associated with a product coded for by a "***sample nucleic acid sequence in*** a target nucleic acid molecule." Therefore, it is unclear if the entire scope of claim 59 and those claims

Art Unit: 1633

dependent therefrom, further limits claim 58, since the method of claim 59 involves wherein the RNA (assuming the RNA here refers to antisense RNA produced from the sense strand in claim 58) cleaves *an* mRNA sequence transcribed from the target nucleic acid.

Claim 59, recites the phrase "the RNA," in the first line. However, the metes and bounds of this phrase are vague and indefinite since it is unclear which RNA Applicants are referring to.

6. As stated in the Petition Decision mailed 12/20/2006, see page 3, last paragraph:

Contrary to applicant's assertions, no new ground of rejection is set forth in the Office action mailed on October 18, 2006; the examiner has merely expanded on the rationale for finding said claims indefinite.

The above grounds for rejection under 35 USC 112, 2nd were not considered to be *new grounds* of rejection as suggested by Applicants in the Petitions filed under 37 CFR § 1.821 mailed 10-30-06 and 1-16-07. Therefore, the above rejection is maintained for the reasons of record.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

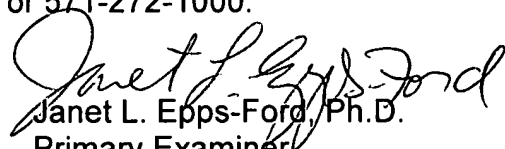

Art Unit: 1633

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
